WINTER WEATHER PREPARATION

With the hint of fall in the air, now is the time to begin thinking about winter weather preparations. Be sure to take a look around for any exposed pipes or plumbing you may have on your property or any plumbing located in unheated areas like garages and sheds along with outdoor faucets and hose bibbs. Any exposed plumbing should be insulated or turned off and drained before we experience freezing temperatures.

While we don't have any expectations of freezing temperatures in the near future, preparations now while the weather is nice will prevent frozen pipes and repairs this winter!

MEET THE STAFF

Pictured from left to right is Assistant General Manager Izzy Villafana, Office Manager Dawnette Boatman and Service Worker James Vankirk.

Izzy ensures the daily operation of the District and with the assistance of James, performs all of the maintenance and repairs necessary to keep the District

facilities operating while Dawnette handles the office functions including customer billing and payroll while also serving as the Board Secretary. If not for these 3 capable employees, the District would not function. If you see them out and about or when visiting the office, please say hi and don't hesitate to ask them for any help you may need as they are always glad to help!

NEXT BOARD MEETING

The next meeting of the Board of Directors of Quail Valley Water District will be held on Saturday, October 25, 2025 at 8:30 AM in the District Office, 24750 Sand Canyon Road.
